# WE NEED YOUR HELP.

**Our Energy, Our Future™**  
A Dialogue With America

Climate change legislation should be:

**Fair** Climate change legislation needs to account for regional differences in how electricity is produced. I should not be penalized because of where I live.

**Affordable** Any climate change law must keep electric bills affordable for all Americans.

**Achievable** Climate change mandates must be realistic to ensure long-term sustainability.

Climate change legislation must be fair and affordable. Urge your elected officials to work with electric co-ops and public power districts to minimize the cost of combating climate change. Given these tough economic times, keeping electric bills affordable must be a priority.
