

Engineering Staking Technician
Southeastern Indiana REMC

Southeastern Indiana REMC in Osgood, IN, is accepting resumes for the position of Engineering Staking Technician. Primary duties include planning and field staking of electric distribution lines, meeting members requesting new electric service and upgrades of existing electric service, preparing construction work orders, drawings, and cost estimates, obtaining necessary right of way easements, permits, and other required documents.

This position requires at least a 2-year Electrical Engineering Technology Degree or closely related field. Engineering Software experience is desired. Prior electric distribution utility experience and knowledge of the NESC and RUS construction specifications is desired.

Qualified persons should mail or email their resumes by July 10, 2018, to
