ORNAMENTAL LIGHTING SERVICE

In addition to the standard security light, the Cooperative will make ornamental lighting available to newly constructed subdivisions pursuant to the following terms and conditions.

All lamps turn on about one-half (1/2) hour before sunset and turn off around one-half (1/2) hour after sunrise each day. This is approximately 4,000 hours of non-metered energy use annually. The luminaries are each controlled by a photoelectric cell, which turns the lights off and on according to the level of daylight reaching the photoelectric cell.

The monthly rates for Cooperative-owned lighting equipment are based on the high-pressure sodium lamp wattage.

The following ornamental lighting rates are available upon up front payment to the Cooperative for the cost of the fixtures and poles selected plus estimated installation cost.
