## HEAT PUMP WATER HEATER REBATES

Looking for an easy way to cut energy costs while reducing your environmental impact? Upgrading to a heat pump water heater is a smart choice—and Southeastern Indiana REMC is making it even more affordable with our energy efficiency rebate program.

### WHY CHOOSE A HEAT PUMP WATER HEATER?

Unlike traditional water heaters that generate heat, heat pump water heaters move heat from the surrounding air into the water tank, using up to 70% less energy. That means lower electricity bills and a smaller carbon footprint—without sacrificing performance.

- Uses less energy, saving you money
- More efficient than standard electric water heaters
- Helps reduce overall energy demand
- Earns you a rebate from SEI REMC!

### HOW MUCH CAN YOU SAVE?

Through SEI REMC's rebate program, members can receive up to \$500 when they install a qualifying ENERGY STAR® heat pump water heater. This rebate makes upgrading more affordable while helping you enjoy long-term energy savings.

### HOW TO CLAIM YOUR REBATE

1. Purchase and install a qualifying heat pump water heater.
2. Complete the rebate application and submit proof of purchase.
3. Receive your rebate as a bill credit—it's that simple!

### START SAVING TODAY!

To learn more or apply for your rebate, visit [www.seiremc.com/rebates](http://www.seiremc.com/rebates) or call 800-737-4111.

**SAVE ENERGY. SAVE MONEY. GET REWARDED**

It's that simple with SEI REMC's rebate programs!
