

BEAT THE SUMMER HEAT

SEI REMC offers programs to conserve power during peak demand periods and lower your energy bill.

BEAT THE PEAK PROGRAM

Beat the Peak is a voluntary program designed to encourage members to reduce their energy usage during peak periods. By everyone working together, we can reduce the REMC's power costs and minimize possible bill increases.

Peak Demand Periods

June - August
Weekdays, 5-8 p.m.

Scan the code to visit our website and learn more about REMC's Beat the Peak Program.

Reduce energy consumption during peak periods by:

- Washing clothes in cold water and delay using the clothes dryer.
- Postpone hot showers and other hot water usage.
- Adjust your thermostat by three degrees.
- Turn off unused lights in your house.

ECOBEE SMART THERMOSTAT PROGRAM

The smart thermostat program is free to join, and in exchange for enrolling, you'll get a free ecobee3 lite thermostat.

Earn up to \$60 in incentives by participating in scheduled load shed events.

Sign up today to participate in summer load shed events in June, July, and August. Electric bills tend to rise during these months. By controlling your air conditioner and heat pump during peak times, you reduce your energy bill while still maintaining comfort in your home.

\$150 SAVINGS!

Help reduce the demand on our electric grid.

Scan the code to learn more and sign up today!

GENERATOR PROGRAM

June, July, and August are summer load control months. By participating in scheduled load controls, you will receive a \$50 monthly control period bill credit.

Help reduce the risk of an energy crisis.

Southeastern Indiana REMC's Generator Program provides you peace of mind with the total home back-up Generac generator. Be prepared and have a back-up so you will not go without power during a storm or unscheduled power outage.
