

# STAY COOL, SAVE BIG WITH OUR MINI-SPLIT REBATE

The warmer months are quickly approaching, and now is the perfect time to make sure your home is ready to keep you cool and comfortable. Mini-split systems offer a reliable and energy-efficient way to maintain the perfect temperature, whether you're cooling one room or your entire home. They not only provide customizable comfort but also help reduce energy consumption, saving you money in the long run. With our rebate program, you can start enjoying a cooler home and real savings from the very first day.

At Southeastern Indiana REMC, we're helping members stay cool and save big with rebates on qualifying mini-split systems:

**\$500**

rebate for a whole-home mini-split system

**\$300**

rebate for a single-room mini-split system

Ready to stay cool and save big?

## The Cool Benefits of Mini-Splits

### ENERGY EFFICIENCY:

Mini-splits use inverter technology that adjusts output based on the room's needs, helping reduce energy waste and lower your monthly bills.

### ZONED COMFORT:

You can independently control temperatures in different rooms or areas, so everyone stays comfortable without over-cooling unused spaces.

### EASY INSTALLATION:

Mini-split systems require no ductwork, making them a flexible solution for older homes, additions, or rooms that are hard to keep cool.

### QUIET OPERATION:

These systems run much quieter than traditional HVAC systems, creating a more peaceful home environment.

### YEAR-ROUND USE:

Many mini-splits offer both cooling and heating, giving you comfort and value all year long.
