

THE POWER OF CONNECTION

At Southeastern Indiana REMC, every number tells a story—not just of kilowatt-hours and fiber connections, but of people, progress, and purpose. As we reflect on the past year, we're reminded how data helps us serve you better and build stronger connections throughout our seven-county service territory.

2024 BY THE NUMBERS

28,525 electric services energized

7,600 SEI Fiber internet connections keeping families, schools, and businesses online

282,000 kilowatt-hours saved through member participation in energy efficiency programs

288 miles of new fiber lines built to reach more unserved and underserved homes

8.21 average services per mile — a testament to our rural roots and commitment to serve, even where others won't

These figures aren't just stats—they're proof of your cooperative's commitment to innovation, reliability, and care.

YOUR DOLLARS AT WORK

In 2024, your cooperative reinvested in system upgrades and service reliability, and supported community programs through Operation RoundUp, which awarded over \$110,650 to local nonprofits and community initiatives.

LOOKING AHEAD

As we continue expanding SEI Fiber and maintaining the electric infrastructure that powers your life, we remain focused on the numbers that matter most: your satisfaction, your savings, and your trust.

Together, we're building something powerful—because staying connected means more than flipping a switch or logging on. It means showing up, investing in people, and delivering on the cooperative difference.
