

KEEPING THE LIGHTS ON & THE PLANET GREEN

HOW OUR LINEWORKERS SUPPORT SUSTAINABILITY

At Southeastern Indiana REMC, reliability and sustainability go hand in hand—and our lineworkers play a critical role in both. While they're best known for restoring power after storms and maintaining our electric system, their work also supports energy efficiency, grid resilience, and a sustainable future for our members.

BUILDING A STRONGER, MORE EFFICIENT GRID

Lineworkers do more than climb poles and repair power lines. Their daily work modernizes and strengthens our electric distribution system, helping reduce energy waste and improve service reliability.

Pole Replacement
Before & After

- Upgrading aging infrastructure prevents energy loss and improves efficiency.
- Installing and maintaining smart grid technology helps detect outages faster, reducing downtime.
- Enhancing system reliability ensures that energy is delivered efficiently, minimizing wasted electricity.

These efforts not only keep the lights on but also reduce the overall demand on the power grid, making the system more energy-efficient.

**RESPONDING QUICKLY,
REDUCING WASTE**

Every minute without power means energy disruptions and potential waste, whether it's food spoilage, business downtime, or increased strain on backup generators. Thanks to our lineworkers' quick response and expertise, outages are restored as efficiently as possible, reducing energy waste and helping members get back to normal faster.

SUPPORTING A BALANCED ENERGY FUTURE

While SEI REMC purchases power from Hoosier Energy, which works to ensure a balanced mix of energy sources, our lineworkers ensure that this power is delivered safely and efficiently to homes and businesses. Their work on power lines, substations, and system improvements helps keep our distribution system ready to adapt to future energy innovations while ensuring reliability today.

THANK YOU TO OUR LINEWORKERS!

This Lineman Appreciation Day, we invite you to recognize the dedicated men who work behind the scenes to power our lives. Their expertise, commitment, and hard work not only keep the lights on—but also help make our energy system more efficient and sustainable for the future.

WANT TO SHOW YOUR APPRECIATION?

Drop a thank-you message on our [Facebook page](#) or send a note to our lineworkers at contact_us@seiremc.com.

**EFFICIENCY.
RELIABILITY.
SUSTAINABILITY.**

OUR LINEWORKERS MAKE IT POSSIBLE.
