GET INVOLVED

VOLUNTEERS NEEDED FOR 2022 SEIREMC DIRECTOR ELECTION NOMINATING COMMITTEE

If you've been looking for a way to get involved with your REMC, serving as a nominating committee member from your district is an ideal place to start. The members of this committee help find qualified director candidates and oversee the voting process at the Annual Meeting.

In 2022, the members of Southeastern Indiana REMC will elect directors from districts four, five, and nine for a three-year term on the board of directors. A total of three member-volunteers from each of these districts is required to be compliant with the bylaws of the corporation.

Qualified members should complete and submit the interest form, available on our website at seiremc.com, for consideration before November

1st. The board of directors will review the list of submissions and appoint the Nominating Committee during the November 2021 board meeting.

If you have any questions, please visit the annual meeting page on our website or contact B.J. Myers, Director of Communications and Creative Services, at (800) 737-4111 ext. 236.

Apply for the Youth Power and Hope Awards.

YOUTH power & hope AWARDS

Are you a middle schooler making a difference in your community?

You could be a winner. Tell us your story.

ELECTRIC COOPERATIVES TO HONOR 'POWER AND HOPE' OF INDIANA YOUTH

Indiana's electric cooperatives and their statewide magazine, Indiana Connection, are accepting applications for awards that recognize the community spirit of Indiana's youth.

The Youth Power and Hope Awards program honors Indiana students in fifth through eighth grades who are leaders in their communities.

Up to five qualified candidates will be selected to receive \$500, be honored this December in Indianapolis during a special program and be featured in Indiana Connection.

"One of the founding principles of Southeastern Indiana REMC is a commitment to community," said Keith Mathews, General Manager of Southeastern Indiana REMC. "We are proud to be a

part of recognizing the community service efforts of our youth."

Past award recipients include students who have initiated a coat drive for the underprivileged, supported patients at Riley Hospital for Children, worked with special needs children, volunteered at a local animal shelter, raised money for the American Cancer Society, and more.

Applicants must submit an online application at indianaconnection.org/youthpowerandhope. When doing so, applicants will be asked to provide examples of and information about their community service activities, share any relevant photos, and list references who may be contacted for additional information.

Deadline for entries is Friday, Oct. 1.

FIBER UPDATES

Construction of the fiber mainline is underway and crews are working to complete the first phase of the build-out, which includes the Elrod, Versailles, Hopewell, Jennings, Pleasant, and Five-Points areas. Property tax ordinances have been secured in all seven counties. (Dearborn, Franklin, Jefferson, Jennings, Ohio, Ripley, and Switzerland)

Service is now available in the Elrod area. Members in that area are encouraged to sign up now.

of miles of mainline construction completed: 340 miles of fiber/227 miles of strand

of construction crews working: 23

Construction Crews: Electricom, Gaylor, and Team Fishel
Drop Contractors: Pete's Trenching, Team Fishel, and Comers

of members receiving service: 17

PLUG INTO SAFETY

Are you among the growing number of drivers sliding behind the wheel of an electric vehicle? Do you know the safety rules for recharging your EV?

ELECTRIC VEHICLE CHARGING 101

Switching over to an electric vehicle allows you to "fill 'er up" with kilowatts at a fraction of the cost of gasoline. But just as fuels come as gas, diesel or E85, or in different octanes, electric vehicles have three general types of chargers. GoElectricDrive.com, which promotes EV awareness, has outlined the three commonly used chargers.

Level 1: Charger uses a standard 120-volt outlet. All drivers can charge their EV at level 1 at home and it requires no extra equipment or installation. On average, a full charging time is about 8 hours — but it varies by model. Consult the automaker's website for more information.

Level 2: Charger uses a 240-volt outlet. Homeowners may decide to install a charging station — also known as electric vehicle supply equipment (EVSE) — in their home. This requires professional installation of an outlet type commonly used by large appliances like electric ranges and dryers. There are also many level 2 chargers across the United States in public areas. On average, full charging time varies from 2 to 6 hours.

Level 3: These "DC Fast Charge" networks provide about 80 percent of a vehicle's potential battery power in about 15 minutes. They are not currently available for home installation.
