FINAL PHASE OF BUILDING PROJECT UNDERWAY

On July 28, 2022, employees and members of the Osgood community watched as the demolition of the old REMC headquarters office building began. There was a mix of emotion tied to this event, which began the final phase of the REMC headquarters building project.

"I don't know how I feel", said Carlyn Wilburn, Manager of Billing and Payments. "I'm not really sad to see the old building go because I know it was in such bad shape. It's just that for 45 years I have worked in that building and there are lots of memories tied to it and the people I have worked with through the years."

During the week leading up to the demolition, many employees took the opportunity to walk through the empty hallways and revisit offices one last time. "It's so sad", said Sharon Cumberworth, Engineering & Design Service Representative, who began her REMC career in 1988. "It's hard to see the place I've worked for so many years being torn down."

"I didn't expect to feel this nostalgic about it", said B.J. Myers, Director of Communications and Creative Services. "I am thrilled to be working in our new office space, but I am grateful for the relationships that have developed and the personal and professional growth that has taken place within those walls."

The REMC building, originally built in the early 1940's, has seen a lot of changes through the years. It has gone through several remodeling projects to adjust to the evolving workforce and the maintenance of the building.

"When this project began, we had every intention of doing another remodel of the existing building," said Keith Mathews, General Manager. "However, the deeper we got into the planning and the more we talked to the contractors and building experts, we realized that the cost of a remodel would be as great if not greater than the cost to build new."

For the remainder of the summer and early fall, members will see the work continue as the remains of the old building are removed from the property and parking and heavy truck traffic areas are repaved. Headquarters visitors are encouraged to avoid this area for safety reasons.

Visit our website to see photos and video of the demolition process.

HYBRID/HEAT PUMP WATER HEATER

Rebate for new construction or replacement of existing water heater.

REQUIREMENTS:

- *Must be a heat pump or hybrid water heater.*
- *Must be a minimum 40 gallon all-in-one unit.*
- *Must be installed in primary residence.*

There is no incentive for electric resistance tank or tankless water heaters. Rebated equipment must be installed in primary residence. Limit of 2 water heater rebates per member household per life of the rebated equipment.

All homeowners must complete a rebate application form and provide proof of purchase to receive any 2022 rebate. Application must be received by Southeastern Indiana REMC by December 15, 2022 and within 90 days of the rebated equipment's installation date in order to qualify for the 2022 Rebate Program.

The cooperative reserves the right to approve, deny or select the appropriate rebate. The co-op also reserves the right to inspect and verify installation of equipment receiving a rebate.

To view the full list of requirements, download the application and learn about other rebates offered by Southeastern Indiana REMC, visit www.seiremc.com/rebates

LEARNING AT THE SPEED OF LIGHT

While you're checking off the items on that back-to-school list, you might want to consider adding SEI Fiber to the list.

- Fast and reliable internet is an important part of your student's education.
- Many textbooks are accessed online.
- Many schools issue each student a tablet or chrome book for the school year for the purpose of completing lessons and submitting assignments.
- Do your kids ever have to work on group projects? If you don't have high-speed internet, you may become frustrated trying to schedule a time for the students to get together outside of the classroom to work on their project.
- Fiber internet is also helpful in speeding up the time it takes to complete homework after school.

We all want to give our children the best opportunity for success. An investment in fiber internet, is not just another item on the school supply list. It's an investment in your child's future.

For more information about SEI Fiber, including price packages and installation details, visit www.seiremc.com or contact the member services department at 800-737-4111.
